CLIENT UPDATE: HELPING YOU KEEP YOUR EMPLOYEES HEALTHY, FALL 2009

At Avizent, we are committed to understanding and helping our clients mitigate potential risk. We would like to share some valuable materials for controlling the effects of both the seasonal and H1N1 flu. In October 2009, Avizent distributed this information to its employees to help them recognize the symptoms, and to offer preventative measures to avoid contracting and spreading illnesses. We encourage you to share these materials with your employees as well.
